

# CsecIITB CTF 2020

---

Category: Forensics

Challenge: EXampleIF

Points: 500

Description:

Beware, Hackers may pick out your passwords from your FaceBook images. HaHa just kidding. Or am I (Vsauce music plays) Facchas rejoice [EXampleIF.jpeg](#)

Idea:

This is an easy problem. We have an image and need a flag just see if there is something encoded.

Using [Forensically Beta](#) and seeing the string extraction data we get our flag. Facchas rejoice. *Flag :*
